EDUCATION

University of California, Davis, Ph.D. Ecology 2018
University of San Francisco, M.S. Biology 2010
University of California, Davis, B.S. Wildlife, Fish, & Conservation Biology 2002

EMPLOYMENT

Center for Watershed Sciences, UC Davis:

Post-doctoral Researcher	Oct 2018–present
Graduate Student Researcher	2014–2018
Jr. Research Specialist	2011–2014

USDA Forest Service, Pacific Southwest Research Station:

Biological Science Technician	2010
-------------------------------	------

University of California, Berkeley:

Research Assistant II	2009–2010
-----------------------	-----------

University of California, Davis:

Research Assistant II	2009
-----------------------	------

Stillwater Sciences:

Fish & Wildlife Biologist	2002–2011
---------------------------	-----------

National Park Service (Sequoia & Kings Canyon):

Biological Science Technician	2001
-------------------------------	------

TEACHING

Instructor, Foothill Yellow-Legged Frog Ecology, Management, and Regulation 2018

One of three main instructors for workshop designed to cover the natural history and management of the foothill yellow-legged frog, a CDFW candidate species once widespread in California. Three days of lecture followed by a field day covered ecological requirements of the species, mitigation, restoration, and permitting requirements if listing takes place.

Research Facilitator, Strategies and Techniques for Analyzing Microbial Population Structures (STAMPS)
2019

Teaching assistant for course on analysis of metagenomic data. Provided interdisciplinary bioinformatic and statistical training to practitioners of molecular microbial ecology and genomics. Topics covered included acquisition and organization of next generation sequence data; principles of quality control of sequence data and data management; methods of taxonomic assignment and clustering of targeted gene data; assembly, functional classification and characterization of shotgun metagenomic data; statistical models for estimating microbial diversity; and microbial community comparison methodology and metrics. The workshop also included an introduction to the Linux command-line and R statistical environments. (<https://www.mbl.edu/education/courses/stamps/>)

Instructor, Software/Data Carpentry 2016–present

Teach researchers in science, engineering, medicine, and related disciplines the computing skills they need to get more done using open source and reproducible tools. Specifically, have taught ecology/natural science workshops at UC Davis, UC Berkeley, and University of Rhode Island Coastal Institute. (<http://software-carpentry.org/>) (<http://www.datacarpentry.org/>)

Instructor, R for Data Analysis and Visualization in Science 2017–2019

Lead instructor for graduate course teaching R and version control for 25+ students. Course designed to train students in toolsets applicable to the entire process of reproducible data-driven research and encourage the use of open-source tools. Built website and made course materials openly available on github. (<https://gge-ucd.github.io/R-DAVIS/>).

Instructor, Intro to R & Genomics at DIBSI 2017–2018

Data Intensive Biology Summer Institute at UC Davis is a series of two-day or week-long workshops for biologists to learn bioinformatics and data science. The Intro to R course was built as an interactive, week-long introduction to the programming language R. Following Carpentry workshop content, taught basics of R by live-coding with participants. Covered data organization and summarization, visualization and creation of publication-quality plots, and dynamic documents that combine descriptive writing with code. (<https://mikoontz.github.io/data-carpentry-week/>) (<https://dib-lab.github.io/2018-06-27-DIBSI-Genomics/>)

Co-Instructor, Ecogeomorphology, University of California Davis 2015

Taught advanced undergraduate students to multidisciplinary collaborative watershed and stream analysis through combined laboratory and field study of a selected stream system. Educated students from diverse backgrounds to work in interdisciplinary research teams to collect and analyze field data from the Tuolumne River system. Guided, lectured, and taught in classroom, lab, and field, including a 3 day rafting trip on the Tuolumne River.

Lab Instructor/Teaching Assistant, General Biology, University of San Francisco 2009–2010

Lab instructor for undergraduate general biology lab; planned and conducted lab activities and led discussions for two semesters (molecular biology fall semester, organismal biology spring semester). Gave weekly lecture to the class. Wrote weekly quizzes, graded students reports and exams
